Contact and be contacted by professionals like you, **Personally!**

Problem

Professional networks, such as LinkedIn or Xing, are mainly intended to share profiles, offer jobs and training

Users tend to accumulate many contacts that are not relevant or with a low level of commitment. There are no tools to help personal interaction amongst users

The profile search is limited to the user name, institution or company

Solution

meal2meetU is a new concept in networking tools. Designed for professionals, facilitates contact and personal encounter amongst professionals

meal2meetU puts a special emphasis on the personal interaction, taking advantage of any break for meals, after work, casual drink or any moment of distension

Profile search is based on many elements such as languages, location, occupation, sector, role, hobbies and interests

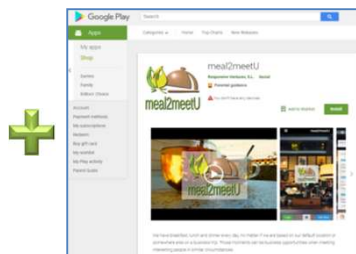

Market/Competitors

Name	Pros	Cons	Relative Positioning
LinkedIn / Xing	Have become standards. Have global presence	Search tools No contact enablers	Designed to facilitate personal contact Search tools to find the right profile
Opportunity	AI driven tool	Search tool is not directly controlled	User has control over profile and search parameters
Sharifyapp	Free and easy to use	Not segmented to a professional use	Reinforce the professional segmentation among users
Normadizers	Free and easy to use Tourism oriented	Segmented to millennial travelers	Emphasize professional focus and use to meet profiles on pauses and trips
Meetapp	Free and easy to use Oriented to restaurants	Mainly designed to share meals locally	Strengthen the member supported concept and the data security
Meetmaps	Free and easy to use Optimized for events	Addressed to event organizers only	Underline the planning, search and management of encounters in advance
